MARCH 2018 – DECEMBER 2018

CLIENT SERVICES, SUNSHINE HQ, NEWTON-ON-DERWENT, YORK

- Implemented design modifications to client website templates using HTML and CSS.
- Participated in the online releases of music projects for international artists, including website maintenance and marketing.
- Managed client services and relationships for major accounts, including international record labels and artists.
- Provided software support and guidance for Sunshine HQ's proprietary Content Management System, Sunlight.
- Assisted with customer support inquiries during high-demand periods.
- Contributed to the development of *4FROM4*, a successful online sales initiative, by selecting and promoting weekly releases from partner clients via the Sunshine HQ blog and social media channels.
- Assisted in the documentation of the company's GDPR policies, ensuring they are in line with the 2018 Data Protection Act.

EDUCATION

JUNE 2024

WEB DEVELOPMENT BSC, ABERYSTWYTH UNIVERSITY

At Aberystwyth University I studied web development, where I learned key practical skills such as:

- Web programming using HTML, CSS, PHP, Javascript.
- Software engineering with the languages C, Java and Kotlin.
- Testing and debugging code using JQuery.
- Creating and managing relational databases by way of MySQL.
- Network administration and security using Linux.
- In the theory modules I studied the business applications of these technologies as well as examined e-commerce strategies.

Some key projects I have completed as part of my university course include:

- A website using Wordpress CMS for Stitch Up Music Group, a Mid Wales based live music promotion company, focusing on gear and venue hiring.
- An energy usage tracking Android app using Kotlin.
- A JavaScript game loosely inspired Space Invaders.
- An educational quiz system as a member of a group project.

At university I was also a founding member of a new society, BandSoc, a society dedicated to bringing like-minded musicians together with the goal of getting more local bands together in the Aberystwyth area.
